Explanatory Notes to the Personal Development Plan

1. Introduction

- 1.1 The Victor Khanye Local Municipality is committed to –
- a) the continuous training and development of its employees to achieve its vision, mission and strategic objectives and empower employees; and
 - b) managing training and development within the ambit of relevant national policies and legislation.
- 1.2 The Victor Khanye Local Municipality will follow an integrated approach to Human Resource Development, that is:
- a) Human Resource Development will form an integral part of human resource planning and management.
 - b) In order for the Victor Khanye Local Municipality's training and development strategy and plans to be successful, it will be based on sound Human Resource (HR) practices, such as the (strategic) HR Plan, job descriptions, the results of the regular performance appraisals, career pathing, scarce skills and talent management and succession planning.
 - c) To ensure the necessary linkage with performance management, the municipality's Performance Management and Development System will provide for the Personal Development Plans of employees to be included in the Annual Performance Agreements. Such approach will ensure the alignment of individual performance objectives to the municipality's strategic objectives, and that training and development needs are also identified during the performance management and appraisal process.
 - d) Career-pathing and succession planning ensures the employees are placed and developed in the jobs according to aptitude and identified potential and through training and development acquire the necessary competencies to prepare them for future positions. Scarce skills and talent management also require appropriate training, education and development interventions.

2. Competence Modelling

- 2.1 What does an institution mean when it says an employee/prospective employee is competent when he/she fits a managerial competency framework or occupational competency profile? The institution is in fact expressing competence as a **future-oriented** ideal that they require to achieve their strategic objectives [The institution is in effect giving a depiction of the desired or required knowledge, skills and attributes for an individual in a specific position]. For competence to be useful, the associated competence should be greater than the observed performance as it will allow the individual growth towards this "ideal".
- 2.2 There is however a risk in expressing a required competence that a current or prospective employee should adhere to in the future, as the future is, by definition, uncertain. Managers cannot know how an employee will perform in the future nor can they know how the employees that they did not select, did not promote, did not award a qualification to, might perform.
- 2.3 Moreover, managers do not make their expressions in a social vacuum. They do so within a social context in which there are various actors, various stakeholders, with different interests, accountabilities, different things they are trying to achieve and various ways in which others will hold them accountable. If managers are selecting

employees, they shall similarly have to justify their decisions to others. Relevance thus becomes an obvious issue that affects the level of confidence in such a decision. Various human resource procedures and systems need to be established to maintain the relevance of the expression of competence to the requirements of the employer. Confidence is the basis on which the various parties implicated in the decisions and actions taken within a competence system will seek to account to others for those decisions and actions.

- 2.4 When linking a decision that a prospective employee / current employee is competent, the communication is based on what may be called conventions of assessment. Some common understanding is achieved by which a certain set of arrangements become socially accepted as the basis for linking different contexts. Contexts differ, in particular in terms of time. So, performance in the past is linked to future situations in which desired performance is anticipated. This linking of contexts will normally involve some model, some way of accounting for the claimed link. The **DPLG** has decided on:

- 2.4.1 A managerial competency framework as an expression of required managerial competencies.
- 2.4.2 Occupational competency profiles as expression of occupation / post competency requirements.

3. Compiling the Personal Development Plan attached as the Annexure

- 3.1 The aim of the compilation of the Personal Development Plans (PDP's) is to identify, prioritise and implement training needs.
- 3.2 The Local Government: Municipal Systems Act: Guidelines: Generic senior management competency framework and occupational competency profiles provides comprehensive information on the relevance of items 2.4.1 and 2.4.2 above to the PDP process. The Municipal Finance Management Competency Regulations, such as those developed by the National Treasury and other line sector departments' legislated competency requirements need also be taken into consideration during the PDP process.
- 3.3 The assessment results of a manager against the minimum requirements contained in the managerial competency framework and occupational competency profiles will assist a manager, in consultation with his/her employee, to compile a **Personal Development Plan** as follows:
- a) The identified training needs should be entered into column **1 of the Appendix, entitled Skills/Performance Gaps**. The following should be carefully determined during such a process:
- i. Organisational needs, which include the following:
- Strategic development priorities and competency requirements, in line with the municipality's strategic objectives.
 - The competency requirements of individual jobs. The relevant job requirements (job competency profile) as identified in the job description should be compared to the current competency profile of the employee to determine the individual's competency gaps.
 - Specific competency gaps as identified during the probation period and performance appraisal of the employee.
- ii. Individual training needs that are job / career related.

Handwritten signatures and initials: "B", "T", "WG", and a large stylized signature.

- b) Next, **the prioritisation of the training needs [1 to ...] in column 1 should also be determined** since it may not be possible to address all identified training needs in a specific financial year. It is however of critical importance that training needs be addressed on a phased and priority basis. This implies that all these needs should be prioritized for purposes of accommodating critical / strategic training and development needs in the HR Plan. Personal Development Plans and the Workplace Skills Plan.
- c) Consideration must then be given to **the outcomes expected in column 2 of the Appendix** so that once the intervention is completed, the impact it had can be measured against relevant output indicators.
- d) An appropriate intervention should be identified to address training needs / skills gaps and the outcomes to be achieved but with due regard to cost effectiveness. These interventions should be listed in **column 3 of the Appendix, entitled: Suggested training and / or development activity.**
The training / development must also be conducted either in line with a recognised qualification from a tertiary institution or unit standards registered on the National Qualifications Framework (South African Qualifications Authority), which could enable the trainee to obtain recognition towards a qualification for training undertaken. It is important to determine through the training / Human Resource Development / Skills Development Unit within the municipality whether unit standards have been developed with regard to a specific outcome / skills gap identified (and registered with the South African Qualifications Authority). Unit standards usually have measurable assessment criteria to determine achieved competency. There is more detail on this in item 4 below.
- e) **Guidelines regarding the number of training days per employee and the nominations of employees:** An employee should on average receive at least five days of training per financial and not unnecessarily be withdrawn from training interventions.
- f) **Column 4 of the Appendix: The suggest mode of delivery** refers to the chosen methodology that is deemed most relevant to ensure transfer of skills. The training / development activity should impact on delivery back in the workplace. Mode of delivery consists of, amongst others, self-study [The official takes it upon him / her to read e.g. legislation]; internal or external training provision; coaching and / or mentoring and exchange programmes, etc.
- g) The **suggested time frames (column 5 of the Appendix)** enable managers to effectively plan for the annum e.g. so that not all their employees are away from work within the same period and also ensuring that the PDP is implemented systematically.
- h) **Work opportunity created to practice skill / development areas, in column 6 of the Appendix,** further ensures internalisation of information gained as well as return on investment (not just a nice to have skill but a necessary to have skill that is used in the workplace).
- i) The final column, **column 7 of the Appendix,** provides the employee with a **support person** that could act as coach or mentor with regard to the area of learning.

- 3.4 Personal Development Plans are compiled for individual employees and the data collated from all employees in the municipality forms the basis for the prescribed Workplace Skills Plan, which municipalities are required to compile as a basis for all training and education activities in the municipality, in a specific financial year and report on progress made to the Local Government Sector Education and Training Authority (LGSETA).
- 3.5 Funding should be made available for training, education and development, in line with the Skills Development Act, at least 1% of the personnel budget must be earmarked for it. Additional funding can also be secured in terms of the provisions of the Skills Development Levies Act from the LGSETA if:
- A Skills Development Facilitator has been appointed.
 - The Workplace Skills Plan has been submitted.

4. Life-long learning

- 4.1 It was agreed that an outcomes-based Lifelong Learning Development Framework would be the basis on which Curriculum 2005 would be developed. The basic principle is that learners should be able to progress to higher levels of achievement by mastering prescribed learning outcomes. Learning programmes should thus facilitate progression from one phase or learning outcome to another and from any starting point in the education and training system. Prior knowledge (acquired informally or by work experience, would also have to be assessed and credited. National qualifications would be awarded, at each of the levels of the National Qualifications Framework (NQF) [see the attached definitions] provided that candidates have accumulated certain combinations of credits and have abided by probable rules of combinations required for such qualifications.
- 4.2 Eight learning areas were identified to form the basis of all education up to the Further Education and Training Certificate:

Nr.	Learning Area
1	Language, Literacy and Communication
2	Mathematical Literacy, Mathematics and Mathematical Science
3	Human and Social Sciences

- 4.3 As is clear from the definitions, there will be four phases, with Adult Basic Education and Training (ABET) linked to the first three. The history of school education had the effect that the majority of the adult population for black communities, were provided with inadequate education or no schooling. Thus ABET is viewed as a force for social

participation and economic development and has been brought into the mainstream of the education and training system. The underlying principles are that ABET should provide a general basic education, promote critical thinking and empower individuals to participate in all aspects of society, and promote active learning methods, and, ABET should lead to nationally recognized certificates based on clear national standards assessed as learning outcomes.

- 4.4 Once the foundation phase is addressed, the other phase can follow suit. In this regard the discussion in item 3.3 (d) refers. Note should also be taken that in addressing professionalization within the local government sector, there may be a need to develop vocational qualifications.
